DETAILS

I am a versatile Full Stack Developer with over 8 years of experience in the **JavaScript** ecosystem, specializing in **React**, **Node.js**, and **TypeScript**. My background includes developing scalable web applications and creating **RESTful APIs** that facilitate seamless integration with various applications. I have strong expertise in both frontend and backend development, with proficiency in database management using **MongoDB** and **PostgreSQL**. I have successfully implemented responsive designs and **CI/CD** pipelines to enhance application performance and reduce deployment times. I am passionate about collaborating with cross-functional teams to deliver high-quality, user-friendly solutions that drive business success.

LINKS

SKILLS

- Node.js, React.js, JavaScript, TypeScript, Python, PostgreSQL, MongoDB, Airflow, REST APIs, dbt, Blockchain, AWS, Docker, Kubernetes, CI/CD

LANGUAGES

- Vietnamese
- English

EXPERIENCE HISTORY

Citics | *Senior Full Stack Developer*

Jan 2025 - Present

- Own the **real estate data warehouse** frontend end to end — **Next.js 16** (App Router, React Server Components, Turbopack), **React 19**, **TypeScript 5**, **Tailwind CSS 4** and **shadcn/ui (Radix)** — spanning 27 domain feature modules covering estates, apartments, projects, verification workflows, pricing maps and compared-asset valuation
- Built the **multi-tenant gateway API** in an **Nx monorepo**: **NestJS 11**, **Prisma 7** over **PostgreSQL 16** with **row-level security** via session-scoped tenant context, **Keycloak (OAuth2 / OIDC)** authentication with **JWKS-verified JWT**, and **Opossum circuit breakers** plus **Kubernetes** liveness/readiness probes for upstream resilience
- Maintain and extend the **Ruby on Rails** core platform: versioned **JSON:API** endpoints (v1–v4), 190+ **Sidekiq** jobs across prioritized queues, **Solr/Sunspot** search including cross-document join queries that avoid reindexing 30M+ records, **AASM** state machines, **PaperTrail** audit snapshots and **Pundit** authorization
- Delivered **geospatial** features across the stack — **Google Maps API** with custom **vector tiles**, **PostGIS** cadastral data, **proj4** coordinate transformation (**VN2000** to **WGS84**), multi-zoom price-map tile generation, and a marker clustering and label-collision algorithm for dense price overlays
- Shipped **in-browser OCR** for land-title certificates using **PaddleOCR v5** through **ONNX Runtime Web (WASM/WebGPU)**, lazily loading the model client-side to extract VN2000 coordinates with no server round-trip
- Generated **type-safe API clients** from **OpenAPI/Swagger** specs (**openapi-fetch**, **openapi-react-query**) across four API versions, and built complex forms and data views with **React Hook Form**, **Zod**, **TanStack Query/Table**, **Zustand**, **nuqs** URL state and **dnd-kit** drag-and-drop uploads
- Established **observability and CI/CD**: **OpenTelemetry** tracing, **Fluentd** log forwarding to **Elasticsearch/Kibana** with **ElastAlert**, **Sentry** error monitoring and **PostHog** analytics, on branch-scoped **GitLab CI** pipelines (staging/UAT/production) with multi-stage **Docker** builds and **nx affected** task graphs
- Built a **multi-tenant billing and analytics dashboard** with per-endpoint usage breakdown, multi-sheet Excel export, query-history audit trail and **role-based access control** (Admin / Viewer / Finance)
- Drive AI-assisted delivery with **Claude Code** and the [BMAD Method](#) for spec-driven development, designing UI/UX in **Google Stitch** and **OpenDesign**, backed by a layered test suite — **Vitest** and **Testing Library**, **Playwright e2e** on a [step-file test architecture](#) with persisted auth sessions, **MSW** mocking and **RSpec**

Heycounsel, Devbase | *Senior Full Stack Developer*

Oct 2024 - Dec 2024

- Architected modern web applications using **Next.js 14**, leveraging **Server Components** and **App Router** to enhance performance and user experience
- Designed scalable frontends with **server-side** and **client-side rendering** strategies, implementing efficient data fetching patterns to improve load times and user engagement
- Implemented enterprise-level authentication and authorization using **Supabase Auth** with custom policies, enhancing security and compliance
- Optimized database performance through **Supabase's PostgreSQL extensions** and **Edge Functions**, resulting in faster query execution and improved application responsiveness

Paramount, Devbase | Senior Full Stack Developer

Aug 2024 - Oct 2024

- Architected modern web applications using **Next.js 14**, leveraging **Server Components** and **App Router** to enhance performance and user experience
- Designed scalable frontends with **server-side** and **client-side rendering** strategies, implementing efficient data fetching patterns to improve application speed and reliability
- Implemented enterprise-level authentication and authorization using **Supabase Auth** with custom policies, enhancing security and compliance
- Optimized database performance through **Supabase's PostgreSQL extensions** and **Edge Functions**, resulting in faster query execution and improved application responsiveness
- Led development teams in adopting type-safe practices with **TypeScript** across the full stack, increasing code reliability and reducing runtime errors

SupplyHive, Devbase | Senior Full Stack Developer

Dec 2022 - Aug 2024

- Architected production-grade applications using **React.js** for the frontend and **NestJS/TypeScript** for the backend, enhancing application performance and scalability
- Designed modular backend systems by leveraging **NestJS's dependency injection, custom providers, and decorators**, which improved code maintainability and efficiency
- Implemented enterprise-level authentication using **NestJS Guards** and **JWT** strategies with **role-based access control**, enhancing security and user management
- Created comprehensive API documentation with **Swagger/OpenAPI** and maintained extensive test coverage, ensuring clarity and reliability in API usage
- Drove technical decisions and mentored teams in full stack best practices, leading to improved team performance and project outcomes

Komi, Devbase | Full Stack Developer

Feb 2022 - Dec 2022

- Architected production-grade applications using **React.js** frontend and **NestJS/TypeScript** backend, enhancing application scalability and performance
- Designed modular backend systems leveraging **NestJS's dependency injection, custom providers, and decorators**, improving code maintainability and flexibility
- Implemented enterprise-level authentication using **NestJS Guards** and **JWT** strategies with **role-based access control**, enhancing security and user management
- Built optimized **PostgreSQL** database solutions with **TypeORM**, handling complex financial data relationships to ensure data integrity and performance
- Created comprehensive API documentation with **Swagger/OpenAPI** while maintaining extensive test coverage, facilitating easier integration and reliability
- Guided technical decisions and mentored teams in full stack best practices using **React.js, AWS, and Docker**, leading to improved project efficiency and team skill development

ThinkN and Bubble, Nexle Corporation | Full Stack Developer

Aug 2020 - Feb 2022

- Built responsive web interfaces using **React.js, HTML5, and CSS3** from **Figma** designs, enhancing user experience and interface accessibility
- Developed backend services with **Node.js** and **RESTful APIs**, improving application performance and scalability
- Managed **PostgreSQL** databases and implemented basic data operations, which ensured data integrity and supported application functionality
- Collaborated with the team using **Git/GitHub** and agile practices, enhancing project coordination and delivery timelines
- Contributed to authentication systems and form validations, increasing application security and user data accuracy

AIA SG Direct, Nexle Corporation | Full Stack Developer

Feb 2019 - Aug 2020

- Built responsive web interfaces using **React.js, HTML5, and CSS3** from **Figma** designs, enhancing user experience and interface consistency
- Developed backend services with **Node.js** and **RESTful APIs**, improving application performance and scalability
- Worked with **PostgreSQL** databases and implemented basic data operations, ensuring data integrity and efficient data retrieval
- Collaborated with team using **Git/GitHub** and agile practices, enhancing project coordination and delivery timelines
- Contributed to authentication systems and form validations, increasing application security and user data accuracy

VO-VMS, Nexle Corporation | Full Stack Developer

Nov 2018 - Feb 2019

- Built responsive web interfaces using **React.js, HTML5, and CSS3** from **Figma** designs, enhancing user experience and interface consistency
- Developed backend services with **Node.js** and **RESTful APIs**, improving application performance and scalability
- Worked with **PostgreSQL** databases and implemented basic data operations, ensuring data integrity and efficient data retrieval
- Collaborated with team using **Git/GitHub** and agile practices, enhancing project coordination and delivery timelines
- Contributed to authentication systems and form validations, increasing security and user data accuracy

AirVinG, Nexle Corporation | Full Stack Developer

Aug 2018 - Nov 2018

- Built responsive web interfaces using **React.js**, **HTML5**, and **CSS3** from **Figma** designs, enhancing user experience and interface accessibility
- Developed backend services with **Node.js** and **RESTful APIs**, improving application performance and scalability
- Worked with **PostgreSQL** databases and implemented basic data operations, ensuring data integrity and efficient data retrieval
- Collaborated with team using **Git/GitHub** and agile practices, enhancing project coordination and delivery timelines
- Contributed to authentication systems and form validations, increasing application security and user data protection

OC3, Sutrix Solution | AEM Developer

May 2018 - Aug 2018

- Architected and drove enterprise-level **AEM** solutions, establishing technical direction and best practices, which improved project efficiency and consistency
- Led complex system integrations and optimized performance across multiple **AEM** environments, resulting in enhanced system reliability and speed
- Designed scalable component architectures and implemented robust development frameworks using **Java**, **HTL**, and **JavaScript**, leading to improved code maintainability and scalability
- Spearheaded migration strategies and established governance models for content management, ensuring seamless transitions and compliance with industry standards
- Mentored development teams and collaborated with stakeholders to align technical solutions with business objectives, resulting in improved team performance and project alignment
- Researched and adopted emerging **AEM** features and industry best practices, enhancing project efficiency and code quality using **React.js** and **REST APIs**

Brie, Sutrix Solution | AEM Developer

Aug 2017 - May 2018

- Designed and implemented complex **AEM** components and templates using **Java**, **HTL**, and **JavaScript**, enhancing the platform's functionality and user experience
- Led third-party system integrations through **RESTful APIs** and custom middleware solutions, ensuring seamless data exchange and improved system interoperability
- Optimized **AEM** performance through advanced caching strategies and code efficiency improvements, resulting in faster load times and enhanced user satisfaction
- Mentored junior developers while collaborating with UX/UI teams to deliver scalable digital solutions, fostering a culture of continuous learning and innovation
- Drove technical documentation and code review processes to maintain high quality standards, ensuring consistent and reliable software delivery

Wildlife Reserves Singapore, Sutrix Solution | AEM Developer

Jun 2017 - Aug 2017

- Developed and maintained **AEM** components using **Java**, **JavaScript**, and **HTML**, enhancing the platform's functionality and user experience
- Supported content migration and authoring within the **AEM** platform, ensuring seamless content integration and consistency
- Collaborated with senior developers to implement and test **AEM** templates and workflows, improving development efficiency and template reliability
- Participated in code reviews and documentation to ensure quality standards, contributing to higher code quality and team knowledge sharing
- Troubleshoot AEM-related issues and provided technical support, resolving problems efficiently and enhancing system stability

EDUCATION

Ho Chi Minh City University of Technology | Bachelor, Information Technology

Sep 2011 - Jun 2016

Certifications
